

RE-PLASTIC TOKYO CHAIR

Wooden and plastic chair, where seat and back is made by composite plastic from an international, danished based company and fish nets. The frame of the chair is designed in birch tree. The chair can be rotated so it can function as either a dinner chair or a lounge chair. The chair is designed so it can be stacked in order that 2.500 chairs stacked and joined forms The Danish Pavilion during The Olympic Games in Tokyo in 2021. The chairs can after The Olympics be disassembled and once again be used as a chair.
