PROJECT CHARACTERISTICS

Carlsberg has just inaugurated their brand new water recycling plant in Fredericia this May 2021. With their Together Towards Zero approach, Carlsberg is committed to act for a sustainable future. That is why they decided to go all in by thinking sustainably for every details, including the furniture.

Re-Plastic has designed a conference table, custom made for this meeting room. With a frame made out of discarded wood, this table is 100% upcycled. To be well seated around this beautiful table, there are of course chairs from the new Ocean OC2 collection made in collaboration with Mater. It is a reproduction of a collection first created in 1955 by the 20th century's most renowned design couple: Nanna and Jørgen Ditzel.

With their steel frame, the chairs are perfectly adaptable for a usage outside but here, they are perfectly matching with the conference table because they are made out of the same material: Carlsberg DraughtMaster kegs.

PRODUCE

Produce and fill the Draught-Master kegs.

USE

The beer is served and enjoyed.

PICK UP

Carlsberg picks up the empty DraughtMaster kegs.

TRANSFORM

Ready to be reused.

UPCYCLE

Unique upcyclable materials, used for new products.
